EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Kusner on August 25, 2005. The application has been amended as follows:

In claim 1, line 15, the expression "for connecting" has been changed to -- overlying --; line 16, the word "for" has been deleted; and line 17, the expression "so as to be accommodated within an extend of" has been changed to -- such that the entire joining member falls within two parallel planes separated by a distance equal to --.

3. As discussed with Mr. Kusner on August 25, 2005, the above amendments were proposed to better define the features of the instant claimed invention over the prior art of record, i.e. Japanese reference 06153305.

REASON FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: Japanese reference 06153305 appears to be closest to the instant claimed invention; however, neither one of or the combination of elements 29 or 31 of the Japanese reference are readable as a block that overlies the ends of the induction line covers, that comprises a receiving section receiving the engaging sections of the induction line covers, and that is formed such that the entire joining member falls within two parallel planes separated

by a distance equal to the diameter of the cylinder section of the induction line covers when the engaging sections are engaged toward the movement track.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
